
“What Scientists can Learn from Artists”

CONTENTS

Preface

Introduction : Sharing opportunities

Part 1 - Setting the scene

<i>Chapter 1</i>	<i>The Modernist revolution in painting</i>	1 - 5
<i>Chapter 2</i>	<i>Knowledge, skill and feelings.</i>	6 - 20
<i>Chapter 3</i>	<i>Memory and visual Systems</i>	21 - 31
<i>Chapter 4</i>	<i>The nature of seeing.</i>	32 - 38
<i>Chapter 5</i>	<i>Experienced reality</i>	39 - 54
<i>Chapter 6</i>	<i>Perception of illusory pictorial space.</i>	55 - 60

Part 2 - The evidence

<i>Chapter 7</i>	<i>An artist finds himself amongst scientists.</i>	61 - 92
<i>Chapter 8</i>	<i>The drawing experiments.</i>	93 - 110
<i>Chapter 9</i>	<i>Constraint in artistic practices.</i>	111 - 131
<i>Chapter 10</i>	<i>Blind-sight, unilateral-neglect and the bakery facade illusion.</i>	132 - 146
<i>Chapter 11</i>	<i>Movement, surface-form and spatial layout.</i>	147 - 158
<i>Chapter 12</i>	<i>Body colour and local interactions.</i>	159 - 188

<i>Chapter 13</i>	<i>Edwin Land's colour-constancy demonstration.</i>	189 - 201
<i>Chapter 14</i>	<i>The colour-constancy algorithm.</i>	202 - 218
<i>Chapter 15</i>	<i>The other constancies.</i>	219 - 227
<i>Part 3 - Eye/brain mechanisms</i>		
<i>Chapter 16</i>	<i>Introducing to visual perception.</i>	228 - 240
<i>Chapter 17</i>	<i>Eye mechanisms.</i>	241 - 253
<i>Chapter 18</i>	<i>Brain mechanisms.</i>	254 - 269
<i>Part 4 - Theory</i>		
<i>Chapter 19</i>	<i>Progressing to more general theory.</i>	270 - 290
<i>Chapter 20</i>	<i>The origins of the model.</i>	291 - 309
<i>Chapter 21</i>	<i>Making use of light born information : a model.</i>	310 - 343
<i>Chapter 22</i>	<i>Summing up.</i>	344- 348
